

Dr. Grip G-SPEC Mechanical pencil / Use and Care Guide

We developed an easy-to-manuever writing instrument based on ergonomics.

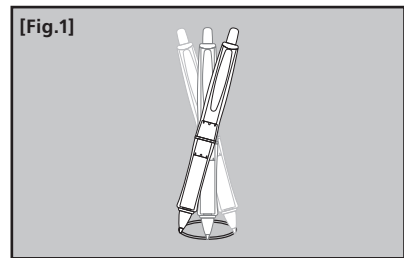

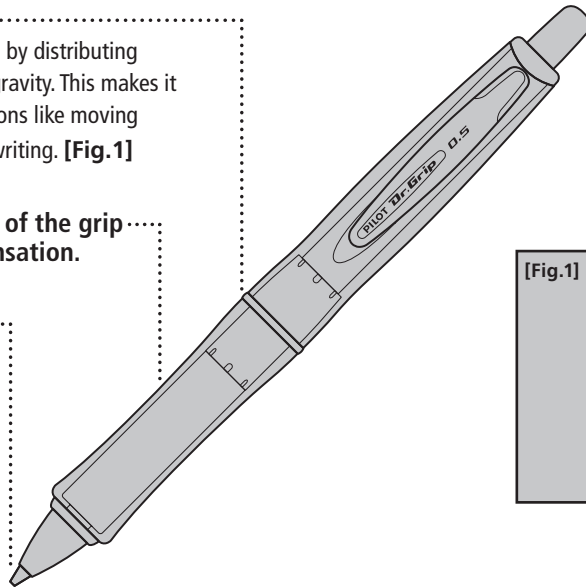

Mechanical pencil

1. Optimal weight balance

Optimal weight balance is achieved by distributing more weight around the center of gravity. This makes it easier to maneuver the pen for actions like moving back and forth and rotating while writing. **[Fig.1]**

2. The double-layer structure of the grip
creates a new gripping sensation.

3. Equipped with the
Fure Fure mechanism.
Simply shake the pen to extend the lead!

Remarks

- Please do not use this product for any purpose other than writing.
- Handle with care because the point is sharp.
- Do not swallow the parts, such as the knob, eraser, and tip.
- Keep away from children.
- Do not store in places exposed to direct sunlight or high temperatures.
Use PILOT lead refills. Please also be sure to use lead refills of the same diameter as the writing unit.
For spare erasers, please use the PILOT **HERF-10**.
